

CERAMYK 8730

COLORIS®

The CERAMYK 8730 has been specially developed for glazed ceramics so that commercial kitchens, show kitchens or youth hostels can label their dishes to prevent confusion or theft.

Properties:

This quick-drying stamping ink is suitable for dishwashers and shows excellent resistance to commercially available washing tablets and industrial cleaners! It adheres very well to glazed surfaces and has a brilliant colour due to the used dye.

Application:

We recommend the CERAMYK 8730 for marking glazed ceramic surfaces and porcelain. For high-quality glazes, we recommend a test in advance, as these glazes are often surface-treated.

Drying time:

~ 3-4min (ceramics);

Viscosity:

Low viscous, ~ 20 s
(DIN 4mm cup)

Stamp material:

Rubber

Thinner/cleaner:

Thinner 405 or 415

Colour carrier:

SOLI round cushions and SOLI plate cushions, felt cushions, COLORIS cushions and flexographic printing units with colour trough are especially recommended.

Available standard sizes:

50ml/g 250ml/g 1000ml/g 5000ml/g
